### Notes:

- Ballast compatibility is for the primary number of lamps being operated on the ballast. Consult Universal for de-lamp application compatibility.
- Ballasts must be wired per their exact wiring instructions to ensure compatibility.

Not using a lamp which is compatible with a ballast may lead to product failure which may result in dangerous conditions which could cause property damage or personal injury.

Everline LED replacement lamps have been tested to be compatible with the lists of ballasts shown on the chart by Universal Lighting. The ballast manufacturers listed have neither performed nor confirmed the testing. Testing by Universal Lighting will continue and the list will continue to be updated. If a ballast does not appear on this list, it does not mean that it is not compatible. Please contact Universal at 1-800-225-5278 about ballasts that are not listed.
