Universal Lighting Technologies Introduces Multi-5™ Uni-Pak™

Revolutionizes line of HID Retrofit Kits

NASHVILLE, Tenn. (April 1, 2001) — Universal Lighting Technologies, a leading manufacturer of electronic and magnetic ballasts, introduces the Multi-5™ Uni-Pak™ as an upgrade to its line of HID retrofit kits. In addition to Universal Lighting Technologies' industry-renown HID retrofit kit components, the Multi-5™ Uni-Pak™ is now available with a metal halide or high pressure sodium lamp.

Universal Lighting Technologies' Multi-5™ Uni-Pak™ kits contain the appropriate core and coil, a protected oil-filled capacitor, a lamp and all other components required for easy installations and retrofits packaged in a sturdy box with a handle. Additional features and benefits of the Multi-5™ Uni-Pak™ are:

- Prewired capacitor and ignitor (if required) to save installation time and reduce wiring errors;
- Color-coded leads to reduce risk of incorrect wiring inside the fixture;
- Capacitors that offer trip fault protection; and
- Simple installation instructions and troubleshooting tips.

"The Multi-5™ Uni-Pak™ offers multiple benefits for distributors in that it reduces inventory required by stocking one innovative retrofit kit instead of numerous ballasts, brackets and lamps. In addition, the energy-efficient Multi-5™ ballast ensures that you have the right ballast for the application or retrofit," explains Bill Brosius, HID product director.

The Multi-5™ ballast adds a 480-volt tap in addition to the industry-standard quad ballast, which is capable of 120, 208, 240 and 277 volts. Indoor/outdoor applications for the Multi-5™ ballast include large retail stores, sports arenas, parking lots, roadways and other similar environments.

The Multi-5™ Uni-Pak™ is available for 250- and 400-watt metal halide and 250- and 400-watt high pressure sodium applications.

For more information about the Multi-5™ Uni-Pak™, fax your request to (615) 316-5146 or visit the Web site at www.universalballast.com.

Universal Lighting Technologies Inc., based in Nashville, Tenn., has offered the most innovative selection of lighting ballasts for more than 50 years. With operations and distribution worldwide, the products of Universal Lighting Technologies are marketed under the Universal® and Triad® brand names.
