## FOR IMMEDIATE RELEASE

# Universal Lighting Technologies Offers Extensive Line of Electronic Compact Fluorescent Ballasts

**NASHVILLE, Tenn. (June 03, 2002)** – Universal Lighting Technologies' comprehensive line of Triad® electronic compact fluorescent ballasts covers lamp applications ranging from 13 to 70 watts and features installer-friendly universal input voltage (108 – 305 volts). The Triad® compact fluorescent ballasts are designed to operate one or two lamps and they power multiple lamp types for added versatility.

Universal Lighting's Triad® compact fluorescent ballasts are ideal for a wide variety of downlight and surface mount applications, including atriums, hotel corridors, elevators, and vandal-resistant fixtures.

All models incorporate Programmed Rapid Start technology ensuring optimal lamp performance, feature an auto-reset shutdown circuit for end-of-lamp-life protection, and are designed in a metal case and special potting compound for optimal heat dissipation. Total harmonic distortion (THD) is less than 10 percent.

"The small package and universal input voltage make Universal Lighting Technologies' Triad® compact fluorescent products ideal for unique applications," said Peter Revesz, product manager of electronic products. "The Triad® compact fluorescent ballasts provide design solutions for intricate lighting fixtures."

Universal Lighting also offers a variety of 347-volt models in the 13- to 70-watt range for the Canadian market.

For more information about lighting ballasts and controls, fax your request to (615) 316-5146 or visit the Web site at [www.universalballast.com](http://www.universalballast.com).
