Universal Lighting Technologies Triad® T5 and T5/HO Ballast Family

NASHVILLE, Tenn. (April 8, 2003) – Universal Lighting Technologies' Triad® T5 and T5/HO high-efficiency electronic ballasts offer the industry's smallest cross section for installation and replacement ease.

The Triad® T5 and T5/HO ballast families include products for all of the new linear T5 lamps, both standard and high output. These popular new lamps, combined with the Triad® T5 ballasts, are ideal for applications being developed for architectural indirect and pendant mount fixtures as well as new recessed fixtures for direct lighting. The small cross section allows ballasts to be incorporated easily into fixture applications never before possible.

Designed for operating T5 and T5/HO lamps ranging from 14 to 54 watts, these ballasts feature Universal input voltage, which reduces inventory and ensures you have the right voltage ballast every time.

Features and benefits of Universal Lighting's Triad® T5 and T5/HO ballasts include:

- Small cross-sectional area and low profile height of 1.0_ for flexible fixture design;
- Installer-friendly universal input voltage (108–305 volts) to reduce inventory requirements;
- End-of-lamp-life shutdown circuit with auto reset when replacing lamps;
- Programmed Rapid Start technology for maximum lamp life;
- Less than 10 percent total harmonic distortion (THD);
- Plug-in lead connectors for easy installation; and
- Dedicated models are also available for 347-volt applications.
