FOR IMMEDIATE RELEASE

Universal Lighting Technologies Introduces The ULTim8® High-Efficiency Ballast Family

NASHVILLE, Tenn. (May 6, 2003) – Universal Lighting Technologies introduces the ULTim8® high-efficiency ballast family—the biggest energy-saving breakthrough in linear fluorescent lighting in more than 25 years.

The new and improved ULTim8® family provides up to eight percent energy savings over standard electronic ballasts, and even more when operated with new, energy-saving 30-watt T8 lamps. The ULTim8® product line offers dramatic energy savings with universal input voltage and a low profile package.

ULTim8® high-efficiency family features parallel lamp operation and automatic reset upon lamp replacement as a standard. These high efficiency ballasts operate 1-4 standard or energy-saving T8 lamps, are available with a .78 or .88 ballast factor, and total harmonic distortion (THD) is less than ten percent.

For more information about lighting ballasts and controls, fax your request to (615) 316-5146 or visit the Web site at www.universalballast.com.

For nearly six decades, Universal Lighting Technologies, Inc., has been bringing power and precision to the world's most innovative lighting. Headquartered in Nashville, Tenn., with operations and distribution worldwide, the products of Universal Lighting Technologies are marketed under the Universal® and Triad® brand names. Universal Lighting Technologies is focused on designing, manufacturing and distributing the industry's finest lighting ballasts and controls. Universal Lighting Technologies —*The Power to Light. The Power to Lead.*
