FOR IMMEDIATE RELEASE

Universal Lighting Technologies Offers The “ULTim8” HVR Solution

NASHVILLE, Tenn. (April 12, 2005) – Universal Lighting Technologies has designed the ultimate T8 ballast for a wide variety of indoor high lumen fluorescent applications. The ballast is appropriately named the ULTim8™, and it is the biggest energy-saving breakthrough in linear fluorescent lighting in more than 25 years. Universal Lighting Technologies is a leading manufacturer of lighting ballasts and controls.

The dedicated voltage ULTim8 family provides up to 6 percent energy savings over standard electronic ballasts and even more when operated with new 30-, 28-, or 25-watt T8 lamps. ULTim8 ballasts are available for 1 to 4 lamp applications with standard and low power ballast factor options. They are designed with universal input voltage and a low profile package.

For more information on Universal Lighting Technologies and the ULTim8 family of ballasts, call 1-800-BALLAST, fax your request to (615) 316-5146, or visit the Web site at www.universalballast.com.

For nearly six decades, Universal Lighting Technologies, Inc., has been bringing power and precision to the world's most innovative lighting. Headquartered in Nashville, Tenn., with operations and distribution worldwide, the products of Universal Lighting Technologies are marketed under the Universal® and Triad® brand names. Universal Lighting Technologies is focused on designing, manufacturing and distributing the industry's finest lighting ballasts and controls. Universal Lighting Technologies—*The Power to Light. The Power to Lead.*
