FOR IMMEDIATE RELEASE

Universal Releases IoT-Ready, Enlighted-Compatible LED Driver

NASHVILLE, Tenn. (Dec. 11, 2018) – Universal Lighting Technologies, Inc., a global leader in lighting and a member of the Panasonic Group, recently announced a collaboration with Internet of Things (IoT) leader, Enlighted, to introduce an EVERLINE® LED driver that meets the recently announced IoT Ready Alliance specification. The EVERLINE LED driver is compatible with Enlighted sensors to allow for easy integration of indoor IoT applications. With the release of the compatible EVERLINE LED Driver, the two companies will concentrate on spreading the adoption of the Enlighted Brilliant Building platform.

Built on an IoT architecture, the Enlighted system consists of a network of wireless sensors connected together to form an intelligent lighting control and analytics platform. With Enlighted's sensor technology and Universal's EVERLINE LED driver, the paired connected lighting solution will offer designers the flexibility of wireless controls along with the advantages of accurate data collection on the building level for unlimited scalability.

The EVERLINE Enlighted-compatible driver is a reliable and robust solution that provides power and data to the sensor and will be offered in three wattages (30/55/80W). By communicating natively with the Enlighted sensor, the LED drivers paired with the Enlighted system eliminate the need for a control unit and put end-to-end programmability in the specifier's hands. This native communication also allows the drivers to operate seamlessly with Enlighted's full suite of sensors. Additionally, the solution provides faster communication and +/- 3 percent accurate power monitoring, allowing more accurate energy monitoring.

"We are thrilled to collaborate with the Enlighted team by offering this innovative LED driver. We know that the ability to speak the Enlighted language will be a key benefit for commercial offices and industrial warehouses," said Kevin Boyce, Director of Product Management for LED Drivers at Universal Lighting Technologies. "With the Class P rating and simple wiring that allows for easy installation, the Enlighted-compatible EVERLINE LED driver is intended to provide the flexibility lighting designers and specifiers need as they maximize the value of their solutions."

As the IoT transforms LED lighting from a source of light to a connected source of data, Enlighted has emerged as a leader in the connected lighting space. The release of the Enlighted-compatible driver demonstrates Universal's industry leadership with a product that communicates natively through the Enlighted Sensor Interface to the Enlighted suite of sensors, eliminating a control unit and providing a simpler installation.

"Our partnership with Universal Lighting Technologies exhibits how the collaboration between driver and sensor companies both enhances the functionality and simplifies the implementation of connected IoT lighting solutions," said Paul Davis, Senior Director of Hardware and Network Products at Enlighted. "These new Universal drivers pair up perfectly with Enlighted's recently announced fifth generation sensor lineup and also offer the lighting industry an excellent range of commercial and industrial lighting solutions compliant with the IoT Ready™ specification."

About Universal Lighting Technologies, Inc.
Universal Lighting Technologies, Inc. a member of the Panasonic group and a subsidiary of Panasonic Lighting Americas, Inc., engineers, manufactures, and markets innovative solutions for commercial lighting across North America, including LED Drivers, LED Modules, Fluorescent, HID, and connected devices using wired and wireless technology. Universal's EVERLINE® LED retrofit continuum provides a range of solutions for upgrading fluorescent to LED. With over 70 years of experience, the company is recognized for its commitment to quality and customer service. Learn more about Universal at www.unvlt.com. Like us on Facebook and follow us on LinkedIn and Twitter.

About Enlighted
Designed to change everything, Enlighted provides the world's most advanced digital sensor and analytics platform for smarter buildings to Fortune 500 companies around the globe. Enlighted was founded in 2009 and has received venture funding from Draper Nexus Ventures, Kleiner Perkins Caufield & Byers, RockPort Capital Partners, Draper Fisher Jurvetson and Intel Capital. The company is headquartered in Sunnyvale, CA. For more information about Enlighted products, visit enlightedinc.com.

About IoT Ready Alliance
IoT-Ready Alliance™ is an alliance of leading lighting, building management, and Internet of Things (IoT) companies and organizations that are creating a common standard for IoT-enabled lighting fixtures. This standard will ensure all new LED lighting fixtures can be shipped with a standard socket to easily add intelligent IoT sensors to the fixture after the fixture has been installed. For more information about the IoT Ready Alliance visit iot-ready.org
