Universal Lighting Technologies Introduces Value Series LED Drivers

NASHVILLE, Tenn. (October 19, 2018) – Universal Lighting Technologies, Inc., a global leader in lighting and a member of the Panasonic Group, has introduced its Value Series LED Drivers for linear and downlight applications. The drivers are specifically designed as a cost-efficient solution for recessed troffers in open office spaces, conference rooms, suspended luminaires and low ambient industrial luminaires.

Available in seven models, the drivers have four different output settings per model. The drivers are offered in three different voltage ranges 18-28Vdc, 24-42Vdc, and 35-52Vdc as well as, a variety of output currents to provide design flexibility. Created for high efficiency, these drivers are ideal for designers who want to combine cost savings with the energy saving performance of LED.

“Value Series LED Drivers are intended to be our most cost-effective LED driver offering for OEMs while still maintaining our high-quality standards,” said Kevin Boyce, Director of Product Management for LED Drivers at Universal Lighting Technologies. “With the addition of these drivers to our product portfolio, we provide enhanced performance and flexibility for virtually any application.”

The Value Series LED Drivers, adjusted with dip switches, are dimmable down to 5 percent. They are UL Class P listed and feature Class 1 and Class 2 control wiring.
