Description: ZH Constant Current Linear LED Module – Hi Lumen

- High CRI
- For use in Class 2 lighting systems
- Zhaga Mounting Pattern

### Mechanical Dimensions

- Length: 22.00”
- Width: 1.61”
- Height: 0.25”
- Weight: 0.16 lbs

### General Performance Specifications

- Lumen Maintenance: L85 50Khrs, \( t_c = 75^\circ C \)
- Color Consistency: <3 SDCM

### Application:

- Min. Ambient Operating Temp.: -22°F, -30°C
- Max. Board Temp. (at \( t_c \)): 185°F, 85°C
- Control Range: 100% to 1%
- Maximum Current rating of 0.900 Amps

### Regulatory

- Recognized - UL8750
- CAN/CSA-C22.2 No. 250.13-12
- RoHS Compliant

### Notes:

- Performance data taken \( T_c = 45^\circ C \).
- \( V_f \) max increases by 2% at 25°C initial turn on.
- \( V_f \) max increases by 10% at -30°C initial turn on.
- Power consumption and photometric performance are typical values.
- Lumen maintenance value is based on LM80 testing and TM-21 calculation projections.

Installation & Assembly Guidelines

**Mounting:**
- This module may be mounted using the mounting holes provided or with a thermal transfer adhesive.
- LEDs should not be touched/contacted during installation to avoid damage.

**Wire Connector**
- Wire connectors will accept 18AWG solid or bonded stranded wire.
- The connector is located on the top side of the circuit board.
- To remove wire from connector, depress the indent on the top of the terminal with a pointed tool, and pull the wire.

**Electrostatic Sensitive Product**
- Installation of Universal Everline LED Modules should be in a production environment that incorporate ESD protective measures.
- When servicing LED Luminaires, technicians should be grounded, and should avoid contact with the LEDs.
Application Notes:
1. The standard base model version of this module without Conformal Coating is designed for indoor fixtures in dry applications. Damage caused by corrosion due to moisture, condensation and other harmful elements, is not covered by the warranty.
2. Proper heat sinking is required to ensure that the module does not exceed its rated temperature. Damage caused by improper heat sinking is not covered by the warranty.

CONDITIONS OF ACCEPTABLE USAGE:
This component has been judged on the basis of the required spacings in the Standard for Light Emitting Diode (LED) Equipment for Lighting Products, UL 8750.

1. The LED modules are intended for connection to a constant current Class 2 power supply. When the arrays are connected and used with power supplies other than class 2, the need for an additional evaluation shall be considered in the end use product investigation.
2. The LED modules shall be installed in compliance with the mounting, spacing, casualty, and the segregation requirements applicable to the ultimate application.
3. The LED modules were not subjected to the Temperature Test per UL 8750 8.3.18. A Temperature Test shall be conducted in the end product with considerations for the following components, their ratings, and LED-to-LED spacing:
   - Printed Wiring Board – 105°C
   - Connectors – 60°C
   - Lens Cover - 50°C
4. The LED modules are intended for use in dry and damp locations when connected to a Class 2 power supply. Use in other than dry and damp locations powered by a Class 2 power supply shall be evaluated to the end use application.
5. All models shall be marked with any voltage and current rating that doesn’t exceed the maximum ratings in the ELECTRICAL RATINGS table of this report. All models are to be used within their marked ratings.
